

Professional Summary

Fullstack Developer with 2+ years of professional experience developing scalable web and mobile applications. Skilled in JavaScript, TypeScript, Next.js, React, Flutter, Laravel, PostgreSQL, MySQL, and Firebase. Experienced in designing RESTful APIs, building responsive user interfaces, integrating third-party services, and developing maintainable software solutions following modern software engineering practices.

Experiences

PT Light Code Digital

Indonesia, Depok

Fullstack Engineer

June 2024 – June 2026

- Developed and maintained scalable web applications using Laravel, Next.js, TypeScript, and MySQL.
- Designed and implemented RESTful APIs with clean architecture principles, improving maintainability and scalability.
- Integrate RESTful APIs, manage local storage, and ensure application performance and security best practices.
- Developed cross-platform mobile applications using Flutter with clean and reusable component architecture.
- Designed and implemented authentication and authorization systems, including custom OAuth2 authorization code exchange flows.
- Developed real-time features using Socket.IO for content management applications.
- Built employee management, attendance, and payroll systems with integrated web-based solutions.
- Integrated third-party services including payment gateways and external APIs while implementing secure webhook handling.
- Collaborated with product teams and stakeholders to analyze requirements, design solutions, and deliver software features.

PT DAC Solution Informatika

Indonesia, Depok

Software Developer Intern

August 2023 – March 2024

- Developed Flutter and Firebase-based applications as part of the development team.
- Built user interfaces and implemented application features based on business requirements.
- Participated in testing, debugging, and optimizing mobile application performance.

Project Experience

Filenta — AI-Powered Document Management System

- Developed a digital document management platform to store, manage, and track documents efficiently.
- Implemented AI-based features to improve document searching, organization, and archive management.
- Designed scalable document processing workflows for better data management.

Quilla — Human Resource Management System

- Developed HR management systems for employee data, attendance, and payroll management.
- Built backend services using Laravel and integrated APIs with frontend applications.

Audify — Audit Management System

- Developed a web-based audit management system to streamline audit planning, execution, and reporting workflows.
- Built dashboard features to improve audit tracking, documentation, and quality management processes.
- Collaborated with teams to deliver a structured and efficient audit management solution.

Media Center — Real-Time Content Management System

- Built a web-based content management platform using Next.js and Socket.IO.
- Implemented real-time communication between clients and servers using WebSocket technology.

SMOOS — School Monitoring System

- Developed a cross-platform mobile application for monitoring student attendance, payment status, and school information.
- Implemented role-based interfaces for schools and parents with real-time access to student data.
- Built features to improve communication and transparency between educational institutions and parents.

Breadit — Social Media Web Application

- Developed a social media platform using Next.js, Prisma ORM, and MySQL.
- Built full-stack features including database integration, APIs, and responsive interfaces.

Technical Skills

Programming Languages: JavaScript, TypeScript, Dart, PHP, SQL

Frontend: Next.js, React.js, HTML5, CSS3, Tailwind CSS, Responsive Design, Figma

Mobile Development: Flutter, Firebase

Backend: Laravel, REST API Development, API Integration, Authentication & Authorization

Database: PostgreSQL, MySQL, Firebase Firestore, Prisma ORM, Drizzle ORM, Pocketbase

Tools & Technologies: Git, GitHub, Postman, Socket.IO, Agile Development

Education

SMK Taruna Bhakti

Indonesia, Depok

Major: Software Engineering / Rekayasa Perangkat Lunak (RPL)

Graduation: 2024

Average Score: 87.03/100

Relevant Subjects: Programming Fundamentals, Database Systems, Web Development, Software Engineering

Languages

- **Indonesian** — Native proficiency
- **English** — Professional working proficiency

Interests

- Software Architecture
- Artificial Intelligence & Large Language Models
- Learning new things
- Open Source Development
- UI/UX and Product Design
- Mobile and Web Technologies
